DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 08/20/2004 have been fully considered but they are not persuasive.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., "the subject matter of the present invention in general, the specification clearly explains that a main purpose of the invention is to enable the testing of a microcontroller even when a JTAG interface is not externally accessible. (See Specification, page 3, lines 19-21)") are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).
Note: nowhere in claim 1 does the Applicant even mention "a JTAG interface is not externally accessible" nor is it clear how such a limitation can be construed from the existing claim language in claim 1.

In response to applicant's argument that "the subject matter of the present invention in general, the specification clearly explains that a main purpose of the invention is to enable the testing of a microcontroller even when a JTAG interface is not externally accessible. (See Specification, page 3, lines 19-21)", a recitation of the intended use of

the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). The Examiner asserts that even if the applicant were to include the limitation, "a JTAG interface is not externally accessible", in the body of the claim, it is not clear how such a limitation would result in any tangible structural change.

The Examiner would like to point out that it is not clear how any of the Applicant's arguments filed 08/20/2004 relate to specific language in the current claims.

The Examiner disagrees with the applicant and maintains all rejections of claims 1, 3-10 and 12. All amendments and arguments by the applicant have been considered. It is the Examiner's conclusion that claims 1, 3-10 and 12 are not patentably distinct or non-obvious over the prior art of record in view of the references, Whetsel; Lee D. (US 6408413 B1) and Margolis, Donald L. et al. (US 5357432 A, hereafter referred to as Margolis)as applied in the last office action, filed 04/28/2004. Therefore, the rejection is maintained.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* **v.** *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

2. Claims 1, 3-8, 10 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Whetsel; Lee D. (US 6408413 B1).

See the Non-Final Action filed 04/28/2004 for detailed action of prior rejections.

3. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Whetsel; Lee D. (US 6408413 B1) in view of Margolis, Donald L. et al. (US 5357432 A, hereafter referred to as Margolis).

See the Non-Final Action filed 04/28/2004 for detailed action of prior rejections.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
